SMILE FOR EVERYONE

LET'S HAVE A LOOK

WHY CLEAR ALIGNERS :

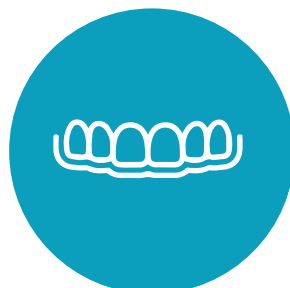

- Clear & transparent
- Invisible Aligners
- No dietary restrictions
- Removable to promote oral hygiene
- Controlled accurate movements
- Remote monitoring options
- Promising results right from the beginning of use.

Digital orthodontics is one of the fastest growing field of dentistry in the world, with accurate and precise results in a short span of time. Clear aligners are an excellent way to expand your practice by offering treatment that patient actively seek.

COMPARED TO CONVENTIONAL ORTHODONTICS THE CLEAR ALIGNERS ARE

- Comfortable
- Removable
- Fast and accurate

SMILE FOR EVERYONE

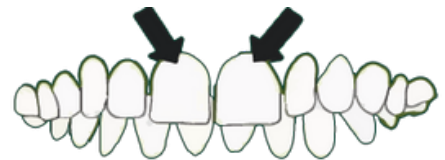

You can treat any malocclusion with clear aligners without people noticing it due to its clear appearance.

1 : Did your teeth protrude ?

2 : Over noticeable large gaps ?

The upper front teeth cover the lower front teeth too much

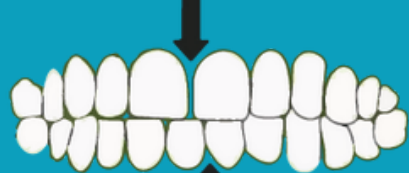

3 : Is there an open bite ?

When only the back teeth are together

4 : Is there an under bite ?

The upper teeth fit inside the arch of the lower teeth.

5 : Do the midlines line up ?

When they do not, the probable cause is drifted teeth or a shifted lower jaw, resulting in an improper bite.

6 : How is the spacing between teeth?

Crowded or overlapped teeth.

7 : Is there a cross bite ?

The upper back teeth are inside rather than outside of the lower teeth.

HEY! WE'RE

HOW WE BEGIN!

The radiant smiles of patients are of a great importance to Dr Abis (The CEO and country head.-Trualign being the UK brand in orthodontics-) from the beginning of his career, during his practice he faced a lot of difficulty in finishing treatments of clear aligners for his patients, so he tried different manufactures of aligners but the results were not satisfactory. Being a reputed dentist and orthodontist of town, Dr Abis has a large number of patients and he always look for complete satisfaction and perfection in his work, but inability to find good and reliable aligners for his patients eventually lead him to establish his own company of clear aligners in 2016. From its humble beginning, Dr Abis started exploring the knowledge and expertise of biomechanics along with a thorough process of manufacturing clear aligners.

The hard work and expertise of Dr Abis resulted in setting a bench mark in the world of orthodontics as he started making every raw material, 3D printer, 3D resins sheets and eventually the most advanced aligners in Pakistan. He is the pioneer manufacturer of clear aligners, with his sheer determination, ismile orthodontics is now serving in 12 countries worldwide including UK, Bangladesh, Malaysia, Tajikistan, New Zealand, Afghanistan, Turkey, Australia, Canada and Pakistan. Our FDA approved medical graded material and latest technology make us the first choice of dentists, who are practicing aligners along with their patients, who have 100% satisfaction on our credit because of the results and our treatment plans which are very accurate and 2 times faster than other aligners, this helps us to grow exponentially and we look forward to bring a radiant smile with convenient, invisible clear aligners.

SMILE FOR EVERYONE

GOOD REASONS TO CHOOSE Tru ALIGN

Competitive Pricing

With a competitive pricing along with unique and advanced 3D technology which we use for patients, makes us the first choice for clear aligners treatment.

100% Guarantee

Dentist friendly raw material and planning treatments according to the needs of patients and concerns of dentists, we deliver them results with 100% guarantee.

Self-Manufacturing

Self-manufacturing of raw material, use of our own 3d printers and software, make our product very unique and advance comparatively to others, we have good after sales services too.

Reliability

We consider every patient and our on-board dentist patients like our family, we have developed reliable customer care relationship and consider them as Tru-align family.

SMILE FOR EVERYONE

Easy Scanning

Easy scanning and submission of the cases with unlimited correction and the best part is that, we accept the iO scans of your own choice and you won't pay anything until you approve your 3D setup.

Communication

We know the importance of after sale communication so we don't just sell our product and leave the client, we have thorough process of after sale support that if the client has confusion about any dental process like using auxiliaries with aligners iprs or anything, we make sure that the client gets everything and do it the right way. We provide complete video series for understanding of product along with use. We do offer zoom sessions to ensure that they follow every step in a right way till the case is finished.

Quality Assurance

For quality assurance, the aligners we make are always checked by a quality controlled department and all of them are professional dentists.

Production Capacity

Due to our own 3D printers, we can produce the largest number of aligners in the world. This is why, we are growing at exponential rate with the production capacity **12,000 +** cases per month

BEFORE

AFTER

UTILISING MORE THAN 6 YEARS EXPERIANCE IN THE BUSINESS, TRU-ALIGN HOPES TO HELP HUNDREDS OF THOUSANDS OF PATIENTS ACHIEVE BETTER SMILES

Every piece of manufacturing and diagnostic know-how that **TRUALIGN** brings to bear in making clear aligners is based on our personal experience and research, and on the real-life feedback from our dentists. Every lesson is one, we've learned first-hand through an iterative process that we improved piece by piece, and continue to improve each and every day

PRECISE ENGINEERING

Through experience and research

STAIN - FREE

CRACK RESISTANT MATERIAL

HAND CHECKED FOR QUALITY

QUALITY

The aligners we make are always checked by a quality controlled department and all of them are professional dentists. Due to our own 3d printers we can produce the largest number of aligners in the world.

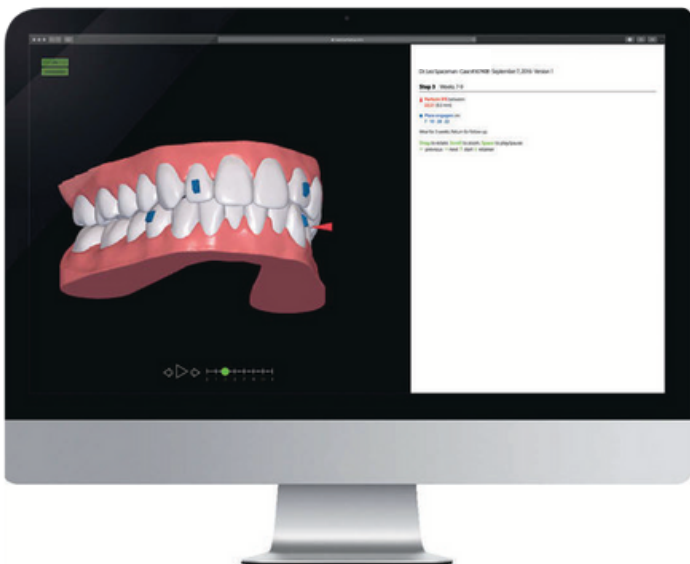

WHEN IT COMES TO SCANNERS, we don't play favorites.

We love intra-oral scans, and we will accept them from any major scanner on the market. They're fast and easy for us to process, which means you can get your cases started quicker while avoiding the messy impressions.

EVERY CASE INCLUDES A MOBILE-FRIENDLY 3D SETUP.

USING OUR OWN App is another step forward in the digital world, through which the dentists can register their clinic with us and can sign up to their id with the user name and password given by the company to put their cases records and the supports for the ongoing cases and to preserve patients records for lifetime.
